

**Mini Staves age your product within months instead of years**

**Still on Tap are pleased to announce that we are now selling Mini Staves!**

Mini Staves

Still on Tap are pleased to announce that we are now selling [Mini Staves](#) to age your spirits or wine to age your product within months. Mini Staves age your product within months inside years waiting inside of large barrels.

Mini Staves still provide the flavour and colouring that traditional barrels will add to your products. By having more surface to liquid space than a barrel can provide, the aging process is sped up in a short amount of time.

Still on Tap offers Oak, Maple and Birch Mini staves in the

traditional toasted Levels 1 through 3. However we also offer chard mini staves in all three species of wood. The chard mini stave is exactly what is in the inside of your whisky barrel. You will never come closer to aging your spirits to actual barrels for several years than using chard mini staves for a couple months.

Our mini staves are available in full bags of approximately 300 pieces and half bags of approximately 150 pieces. Perfect size for the home distiller or wine maker. There is no better way to age your spirits or wine within months!
